

IntelliComm™ Communication Center (For use with the IntelliFlo™)

The IntelliComm™ communication center provides automated control of the variable speed on the IntelliFlo™ VS-3050 pump. By just connecting the input terminal connections to an automation system, a heater, a heat pump or any form of remote control, the four selectable speeds can be enabled. The speeds can each be individually defined by the customer in function of his specific application. **The best way to maximize your pool installation!**

Features:

- Easy installation
- Long-life enclosure design
- 4 pairs of input terminal connections which can be actuated by either 15 to 240 VAC or 15 to 100 VDC
- A two-wire communication cable is included
- 230 V power in. Low energy consumption (< 10W)
- CE approved
- 2 year warranty
